

## Advancing Mobile Wound Care Workflow

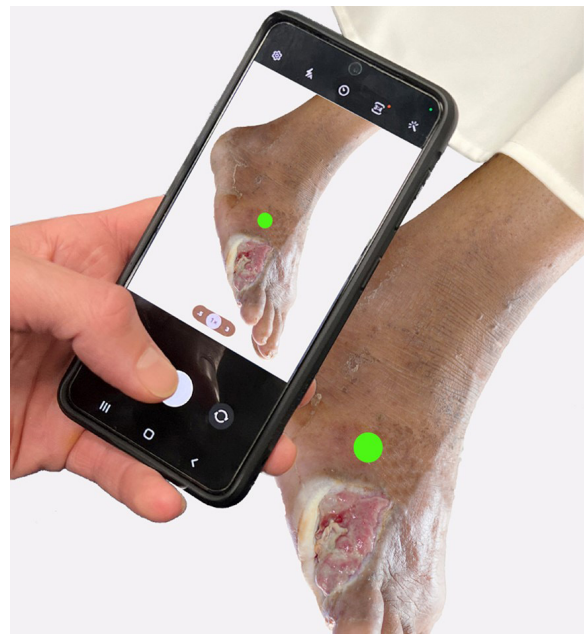

### Simplifies Mobile Wound Care from Imaging to Billing.

The Silhouette platform records accurate wound images and measurements. It captures the data, generates the reports, and supports the accurate claims your business needs.

### End to End Digital Wound Management

- Efficient process online or offline
- Configured for the data you need
- Electronic forms for accurate information
- Dramatically faster IVR submissions
- Works with a wide range of systems
- More accurate and complete claims
- Well established and agile solution
- Better business and patient outcomes

Silhouette empowers wound care providers to conduct thorough and precise assessments, regardless of the patient's care setting.

*"Silhouette's high-quality images and advanced measurement capabilities have revolutionized our wound management protocols, enabling our clinicians to make informed decisions quickly and accurately."*

**Martha R Kelso**  
Chief Regulatory Officer, Wound Care Plus, LLC.

## Redefining Wound Management

The Silhouette wound measurement and assessment process is streamlined with configured care provider forms to help ensure that the required information is seamlessly collected, providing complete and defensible documentation.

**Wound Care Plus, LLC** has found that the digital technology simplifies processes, reduces administrative burdens, and allows providers to focus more on patient care.

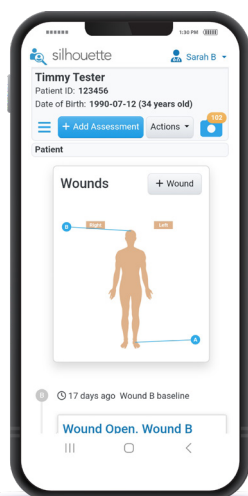

## Mobile Wound Care Providers Love:

- Speed and ease of use
- Accurate, reliable data across users
- Online dashboard reporting
- Clear, consistent images
- Platform configured for mobile users
- Online and offline charting
- Tracking procedures for billing and insurance claims
- Secure, centralized database

## eIVR - Electronic Insurance Verification Request:

The Silhouette Electronic Insurance Verification Request (eIVR) enables a Provider to quickly complete and submit the IVR request electronically within Silhouette to a growing number of integrated CAMPs companies. The integrated process means the response is also returned electronically into the patient's record in Silhouette for the Provider to act on. This is not just a significantly simpler and faster process, it has also optimized returns for the wound care company with more accurate and complete claims.

## Flexible Options:

**Silhouette for mobile devices** enables images and measurements to be easily captured using your phone or tablet.

**SilhouetteStar wound camera** captures high quality 3D measurements that are automatically calculated in SilhouetteCentral software for analysis and reporting.
